Innovative stainless steel products for

- Drinking water delivery, treatment, storage and distribution
- Wastewater treatment
- Stormwater overflow tanks
- Biogas plants
- Manholes

HUBER stainless steel products are the best solution for water and wastewater treatment applications - municipal and industrial. So, you should choose a material that satisfies the highest needs:

- unrivalled lifespan
- absolute corrosion resistance due to acid treatment in a pickling bath and passivation
- standardized products provide safety for planning and cost advantages
- hygienic conditions on the highest possible level provide safety for men and environment

It is our goal to offer perfect products to our customers. That's why it is necessary to utilize correspondingly modern technologies for production. This standard of production is yielded by well - trained and highly motivated employees in combination with the most modern machinery. To ensure continuously high quality for our customers, our company pursues the philosophy of a high vertical integration in production.

According to our philosophy to excel in stainless steel, we process this material solely. This requires very special equipment for the material's mechanical treatment as well as the expertise to know how to process stainless steel properly. To the great extent feasible, we employ computer - assisted machines. This computer assistance results in an increased precision and in minimized errors during production.

All parts and products are treated in a special pickling solution prior to leaving our company. We are certified according to ISO 9001 and ISO 14001.
